

CAPABILITIES

OF HHI CORPORATION

HHI CORPORATION FACTS

- IN BUSINESS 47 YEARS
- QUALIFIED, HIGHLY EDUCATED STAFF
- \$250 MILLION AGGREGATE BONDING
- DIVERSE CLIENTELE
- 15 OUTSTANDING PERFORMANCE EVALUATIONS
- NEVER LATE ON A PROJECT IN COMPANY HISTORY
- 54 ACRES OF HHI PROPERTY
- 90,000 SQ. FT MANUFACTURING SPACE

Located in beautiful Ogden, Utah

54
Acres

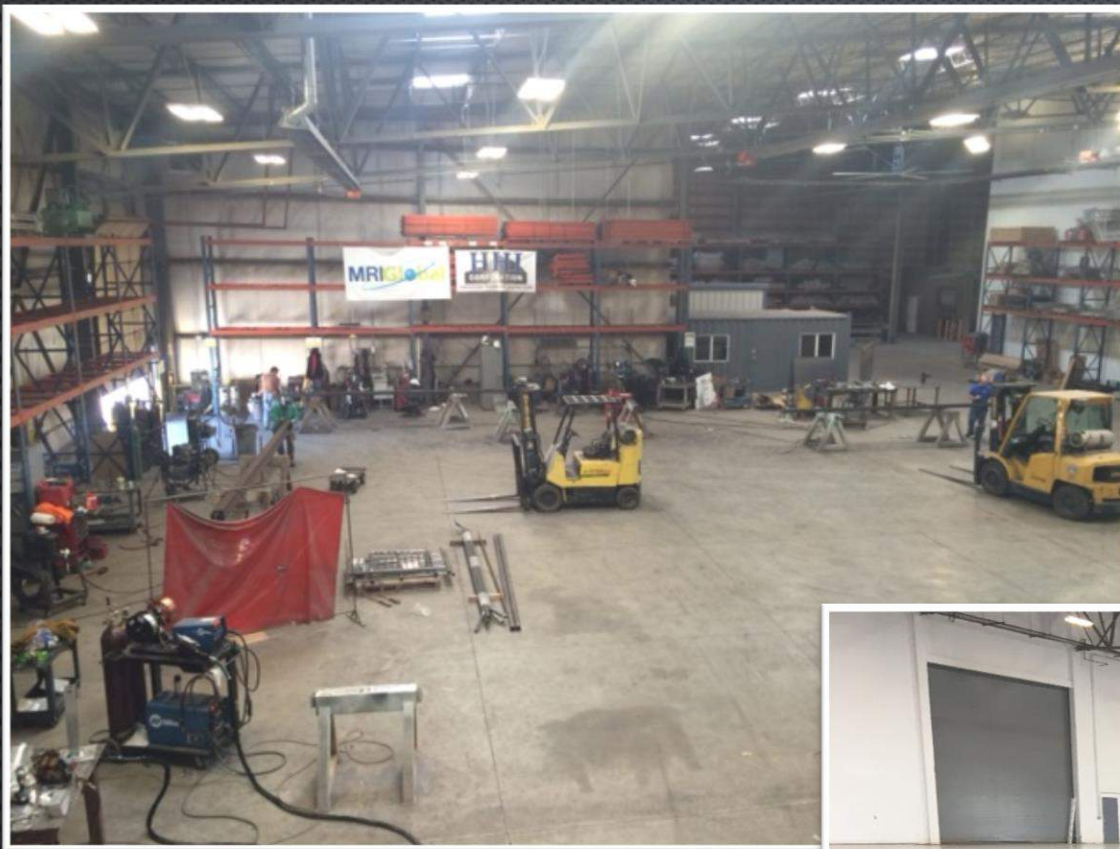

90,000 Sq. Ft Total
Includes Storage
& Office Space

Paint & Blast Booth

90,000 Sq. Ft
Manufacturing Space

C-17

C-17

- Carry up to 6,000 lbs.
- Locks each tire into place
- Adjustable chocks to fit size of tire
- Tailgate doubles as a ramp

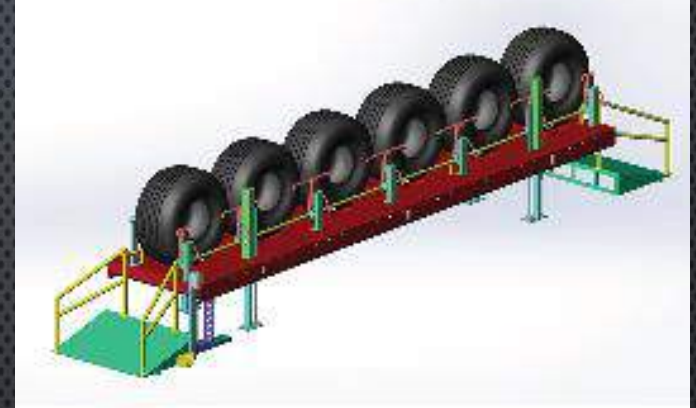

C-17

- HOLDS:
- 2 Complete Sets of C-130 tires
 - 1 Complete Set of C-17 tires
 - ½ Set of C-5 tires

- Extremely efficient
- Easy to use foot pedal
- Hydraulic lift
- Load of 6 tires
- Lifts 24" off the ground

Hottest! New Cutting Edge Technology

Tire Work Station

"The new machine alleviates the need to work bent at the waist for almost the entire break-down of the wheel," said 1st Lt. Naomi Ballard, 62nd Aircraft Maintenance Flight commander. "It's also a safer way to work because the stand holds the tires upright, which eliminates the possibility that the tires will fall over while my guys are working on it."

Since the wheel and tire machine arrived, the capability of the four-man maintenance shop to safely and efficiently rework wheel and tire assemblies has increased insurmountably. Technicians maintain assemblies on 48 of McChord Field's permanently assigned C-17 Globemaster III aircraft, equating to roughly 125 assemblies each month with an average annual inspection rate of 1,300 units.

"The machine is really turning out to be a good investment for McChord and the Air Force," said Owen. "We are easily able to turn out 12 wheels in a four-hour period."
